

## Aircraft Engines Exceptions/Anomalies

The CICTT spent hours reviewing data on existing aircraft engines and how to present data to the aviation public. In most cases, the current aircraft engine valid values work with the format in which the data is presented to the aviation public.

The CICTT is aware that exceptions exist. For example the CICTT decided to list the Type Certificate for the aircraft engines. However, some aircraft engines match more than one Type Certificate.

This document lists known exceptions/anomalies to the existing aircraft engine valid values. The CICTT will update the document as necessary.

## Aircraft Engine Type Certificates

The following aircraft engines have more than one Type Certificate:

AIRCRAFT ENGINE	TYPE CERTIFICATE	COUNTRY	APPLICATION
CFM-CFM56-NO SUB MODEL EXISTS	E28NE	United States	Manufactured in United States
	M15	France	Manufactured in France
CFM-CFM56 2-A	E2GL	United States	Manufactured in United States
	M9	France	Manufactured in France
CFM-CFM56 2-B	E2GL	United States	Manufactured in United States
	M9	France	Manufactured in France
CFM-CFM56 2-UNDESIGNATED SUB MODEL	E2GL	United States	Manufactured in United States
	M9	France	Manufactured in France
CFM-CFM56 3-B	E2GL	United States	Manufactured in United States
	M9	France	Manufactured in France
CFM-CFM56 3-C	E2GL	United States	Manufactured in United States
	M9	France	Manufactured in France
CFM-CFM56 3-UNDESIGNATED SUB MODEL	E2GL	United States	Manufactured in United States
	M9	France	Manufactured in France
CFM-CFM56 5-NO SUB MODEL EXISTS	E28NE	United States	Manufactured in United States
	M15	France	Manufactured in France
CFM-CFM56 5A-1F	E28NE	United States	Manufactured in United States
	M15	France	Manufactured in France
CFM-CFM56 5A-3	E28NE	United States	Manufactured in United States
	M15	France	Manufactured in France
